About me

I am a highly motivated individual with a passion for web development. Although I do not have any professional experience in the field, I have honed my skills through self-study and personal projects. I am proficient in JavaScript and have a strong understanding of React and its associated libraries, including Tailwind, Next.js, React-Router-Dom, and the Context API. I am eager to bring my enthusiasm and technical skills to a web development role and I am confident that I can make a valuable contribution to any team.

Education

Tabriz University Photonics, Msc	2017-2020
Bonab University Optics and Laser Engineering, Bachelor	2013-2017

Experiences

Personal and university project on web development. <ul style="list-style-type: none">Gain full Knowledge on JavaScript, ReactJs, Redux.Comperhensive understanding on NextJs, Static page, and Server side rendering.Considerable foundation on web development basics such as HTML, Css, Sass, Tailwind, and Material-ui.	2018- Present
Product manager on National Laser institue. <ul style="list-style-type: none">Practical usage of solving nonlinear and entangled PDE equations.Iterative algorithms.	2020-2021
Low Earth orbit satellite motion simulation with Matlab. <ul style="list-style-type: none">Optimization algorithms such as: Genetic and Particle swarm optimization.	2018-2020
Setting up Earthquake database and data analyze with Matlab. <ul style="list-style-type: none">Algorithmic thinking and structural programming.	2016-2018

Skills

Work Skills:

- Team work
- Adaptability
- Communication
- Responsibility
- Active listening

React Technologies:

- State management
- Hooks and customize hook
- Context API and Redux
- Responsive layout
- React Testing Library

language:

- English
Considerable Knowledge
- Persian
Full fluency
- Turkish(Azerbaijan)
Mother tongue
